PROFILE

.NET Developer skilled in web applications and backend systems, passionate about efficient development and problem-solving. Strong in teamwork and communication, ensuring smooth collaboration and project success.

SKILLS

- **Languages:** C#, SQL, Python (Basics), JavaScript
- **Frameworks:** ASP.NET, ASP.NET MVC, ASP.NET Core, ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework
- **Technologies:** React.js(Basics), ASP.NET Web API, Windows Services, Unit Testing in .NET
- **Cloud & DevOps:** Azure Data Factory, Azure DevOps, Azure Linked Services, CI/CD Pipelines
- **Big Data & Databases:** Databricks, Databricks SQL
- **Tools:** Visual Studio, SQL Server Management Studio (SSMS), Postman, Git, Azure Portal, NUnit, Rally, Jira

EXPERIENCE

TheRapidHire Pvt Ltd

Indore, India

Software Developer

Dec 2024 – Present

- Developed and optimized **SQL Server stored procedures**, ensuring efficient data management and integrity.
- Built backend logic in **C#** for **ETL workflows** and implemented automated data cleanup in **ASP.NET MVC**.
- Worked on **cloud data transformation** using **Azure Data Factory, Linked Services, and Databricks**.
- Integrated **on-premise and cloud-based ETL solutions**, streamlining **data migration processes**.
- Designed and implemented **Windows Services** for automating background data processing tasks.
- Collaborated with **US-based clients**, participated in **Scrum meetings**, and managed tasks using **Rally**.

Revalsys Technology

Hyderabad, India

Jr Software Developer

Sep 2023 – Nov 2024

- Built web apps using **ASP.NET, ADO.NET, and Web API**, boosting speed and user experience.
- Created a **Windows Service** to auto-process bills, improving accuracy and removing manual work.
- Executed thorough **code testing**, increasing coverage, identifying defects early, and minimizing production issues.
- Improved SQL queries, stored procedures, and database speed while updating UI as per client needs.
- Implemented **Dependency Injection and Factory Design Pattern** for better code maintainability and scalability.
- Collaborated with teams, analyzed business requirements, and managed sprints using **Jira** for project tracking.

PROJECTS

BloodDoner API

- **BloodBank API** manages donor registration, login, and secure access with authentication.
- Supports donor search, data handling with **SQL Server stored procedures**, and role-based access.
- Built with **.NET 8**, using **Factory Design Pattern, Dependency Injection, and JWT** for security and scalability.

Portfolio

- **React.js Integration:** Built a dynamic and interactive UI using a component-based architecture.
- **Modular Codebase:** Organized structure with JSON-based data storage for easy scalability.
- **Responsive Design:** Used **Tailwind CSS** for a seamless experience across all devices.
- **Email Functionality:** Integrated **EmailJS** for contact form submissions without a backend.

EDUCATION

Anand Niketan Collage

Anandwan, Warora, India

Bachelor of Science

2019 – 2022
